PROJECTS

MALLOW TEACHNOLOGIES

Project Name: KVB WEBSITE

Client Name: Karur Vysya Bank

Description: This is a banking application where the end user can be able to utilize internet banking.

Responsibilities:

- Took full ownership as lead developer for a banking website project, managing end-to-end delivery.
- Self-learned and implemented Jekyll to integrate and structure all project pages, despite having no prior experience.
- Successfully integrated APIs using jQuery, ensuring seamless data flow and functionality.
- Earned special appreciation from the CTO for initiative, technical execution, and project leadership.
- Demonstrated adaptability by mastering new frameworks quickly and applying them to production-level systems.

Project Name: FUSE SYSTEMS

Description: Fuse Systems is a Technology Solutions company specializing in Union administration providing Unions with the tools needed to manage internal operations.

Responsibilities:

- Led hands-on development for 3 years, ensuring high-quality, maintainable code across projects.
- Mentored and guided junior developers through code reviews, pair programming, and technical support.
- Managed project tickets and task assignments, streamlining workflows, and ensuring timely delivery.
- Facilitated daily scrums and sprint planning sessions to align team priorities and track progress.
- Oversaw deployment processes, ensuring smooth releases and adherence to best practices.
- Collaborated cross-functional issues quickly and maintain project momentum.

Project Name: Spark Pico

Description: Spark Pico is like a google drive. We can store images, videos, location, text and audio. Also, you can drag and drop those into different folders.

Responsibilities:

- Acted as Project Lead for a banking website, owning requirement gathering directly from clients and translating them into actionable tasks.
- Assigned and tracked tasks for junior developers, ensuring balanced workloads and timely delivery.
- Conducted thorough code reviews to maintain quality, consistency, and adherence to best practices.
- Oversaw the deployment process, ensuring smooth releases and minimal downtime.
- Coordinated with the testing team, managing bug reports and validating fixes to guarantee flawless output.
- Delivered the project successfully, earning recognition for leadership and execution excellence.

TIGER ANALYTICS

Project Name: ABLE

Client Name: OPTUM

Description: ABLE is an enterprise level application where the end user can be able to see Providers information.

Responsibilities:

- Participating in daily standup call and client meeting
- Understanding requirements and converting them into user stories and developing those requirements
- Providing efficient solutions and bug fixes for the application
- Giving demo on completed work bi-weekly and answering the client questions
- Involved in deployments,

OPTUM

Project Name: ABLE

Project Name: MEDUSA

Description: The Medusa Application allows for the creation of Business Plans to support Operational planning for both our Consumer and Core operational teams. This Application is critical in helping planners determine recommendations to ensure service objectives are met on a daily, weekly and monthly basis.

With this data, we are able to tell the story of how a business has performed and gives the ability to determine future needs by combining financial commitments with prior trends.

Responsibilities:

- Led development of the Medusa Application, a centralized platform for creating business plans to support operational planning across Consumer and Core teams.
- Designed and implemented features to align workforce planning with service objectives, ensuring the right staffing levels at the right time and place.
- Enabled planners to generate daily, weekly, and monthly recommendations that improve service delivery and operational efficiency.
- Integrated financial commitments with historical performance trends, providing actionable insights for future resource needs.
- Delivered a critical tool that empowers leadership to track business performance and forecast operational requirements with accuracy.
- Collaborated with cross-functional teams to ensure seamless adoption and alignment with organizational goals.

AWARDS

- ❖ Effectively trained 8 juniors on HTML, CSS, JavaScript and ReactJS
- ❖ Got 5 Green cards in Mallow technology for my responsibilities, developer testing, coding standards, quick learning, owning the project
